Control Dynamics, Inc Introduction

Kennel Gear, a division of Control Dynamics, Inc

Control Dynamics Inc., (CDI) provides highly innovative electrical and mechanical engineering solutions for critical production initiatives in diverse industries from aerospace to pharmaceuticals.

Partnerships with Fortune 500 companies like Boeing and various governments and universities provide long term growth and opportunity. Since 1994, CDI has worked on every Boeing program including the 737, 747, 757, 767, 777, 787 and 777x programs as well as Boeing's host of global customers.

An award winning company featuring patented, innovative engineered products and brands offered through its divisions. Piranha Safety (www.piranha-safety.com) specializes in designing innovative safety products and solutions for industrial workers. Kennel Gear (www.kennel-gear.com) features top of the line animal products utilizing a universal latching system invented by CDI.

CDI has been granted several patents and trademarks and won several awards including:

- 2018 International Award for Powered Access Innovation Award
- 2017 Green Cross for Safety Innovation Award
- 2016 Boeing Supplier of the Year Nominee
- INPEX 2015 Kitchen Innovation Award for "Reach Mobility Moveable Shelf System"

Dexter's Story

The Dog Who Created Kennel Gear

1 Quart Double Bowl System

(PN: 112.010.001)

Dexter was our beloved English Bulldog, he was an 83 pound fun loving guy that could hold three tennis balls in his mouth and give a big tennis ball grin. He was with us for 14 years.

After eye surgery, Dexter was prescribed a cone or E-Collar to wear for 3 months as his eye healed. As we all know, a bulldog with an E-Collar equals total chaos in your home and a very challenging task to feed and water the big guy.

After a week of having to hand feed Dexter by holding the food and water dish at the proper angle to allow him to eat, an idea was formed that there must be a better way to keep Dexter happy and our house in one piece.

The idea of a securely mounted feeding dish was born. The challenge was to make a bowl secure enough for a bulldog to push on but also easily removable for cleaning. After several prototypes and discussions with our veterinarian, the design for Kennel-gear was born.

The Kennel-Gear design broke the mold of rings or mounting systems that leave dangerous brackets hanging from the wall that can harm the animal. Our design solved all the issues that veterinarians and boarding facilities have been dealing with for years, rings that can harm the animals and mounting systems that leave sharp protruding pieces of plastic or steel in the kennel with the animal.

Kennel-Gear, the securely mounted feeding system which leaves no harmful brackets in with the animal and provides a simple easily removable bowl or pail for the safe feeding of your pet.

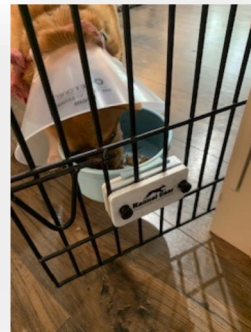

Elevated Pet Feeding Systems

Kennel Gear offers a variety of elevated feeding solutions in an array of different sizes and styles. The main design of Kennel Gear was to be paired with an Elizabethan Collar (E-Collar). The bowl is fixed to a solid surface and raised off of the ground; this prevents the bowl from being pushed around during the meal times. The raised bowl allows for the E-Collar to go around the bowl so food does not get scooped into the E-Collar.

Using an elevated feeding system has many benefits to you and your pets. The ability to adjust the feeding system to the height for your pets allows for the pet to adjust to the age and stage in which your pet is at. An elevated feeding system can also help alleviate pressure on arthritic joints and may also help prevent bloat. The eating area for your pets is kept cleaner with an elevated feeding system because food crumbs and water cannot be trapped under the bowl. You will be able to see and clean the debris easily and without

(PN: 149.050.001)

20oz Plastic Bowl System—Blue
(PN: 149.048.001)

Plastic Bowl System

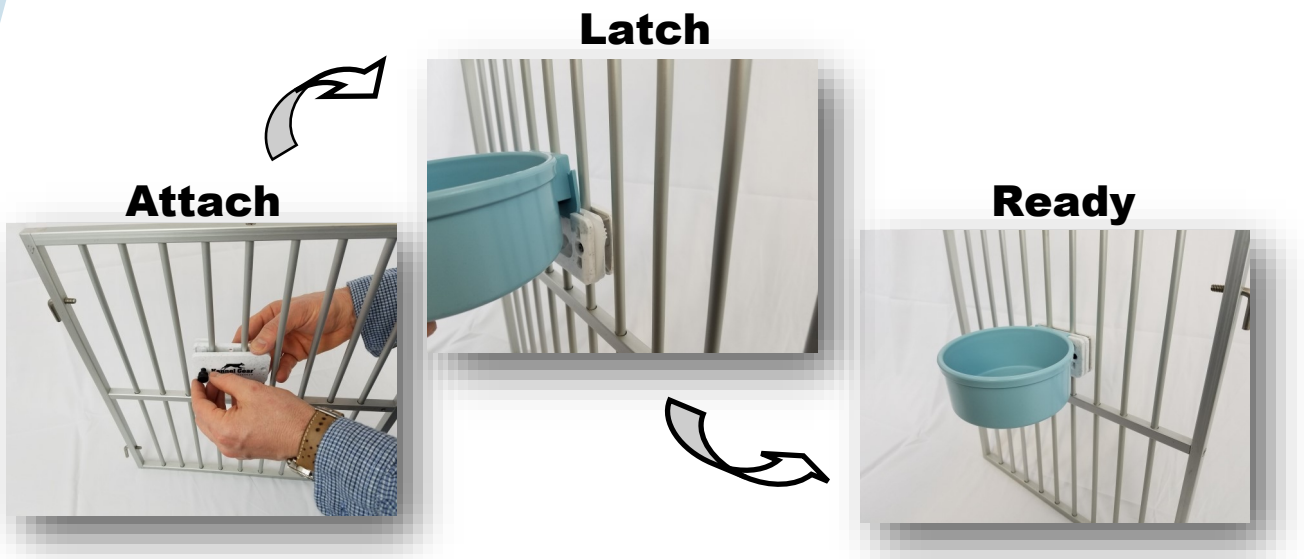

Kennel Gear's Plastic Bowl System is a height adjustable feeding solution. The 20 ounce plastic bowl is made from a food grade polypropylene material. Polypropylene has a molecular structure that does not allow bacteria to imbed into the plastic and grow; this allows for a cleaner eating and drinking environment. In the event the polypropylene bowls are chewed on, the material is designed to crumble and not create sharp edges.

Color Options:

Kennel Gear Stainless Steel Bowls

1 Pint Double System

2 Quart Bowl System

1 Quart Double w/ Chain-link Fence Mount System

1 Quart Single w/ Chain-link Fence Mount System

Stainless Steel Bowl System

Kennel Gear's Stainless Steel Bowl System is a height adjustable solution. The stainless steel bowls are offered in both a single bowl and a double bowl in variety of sizes. The bowl attachment comes in 3 different strengths. The first is our light duty; this material is a 1.25" 5052 Aluminum. The material is pliable and can be bent back to original state, approximately 30 times before failure.

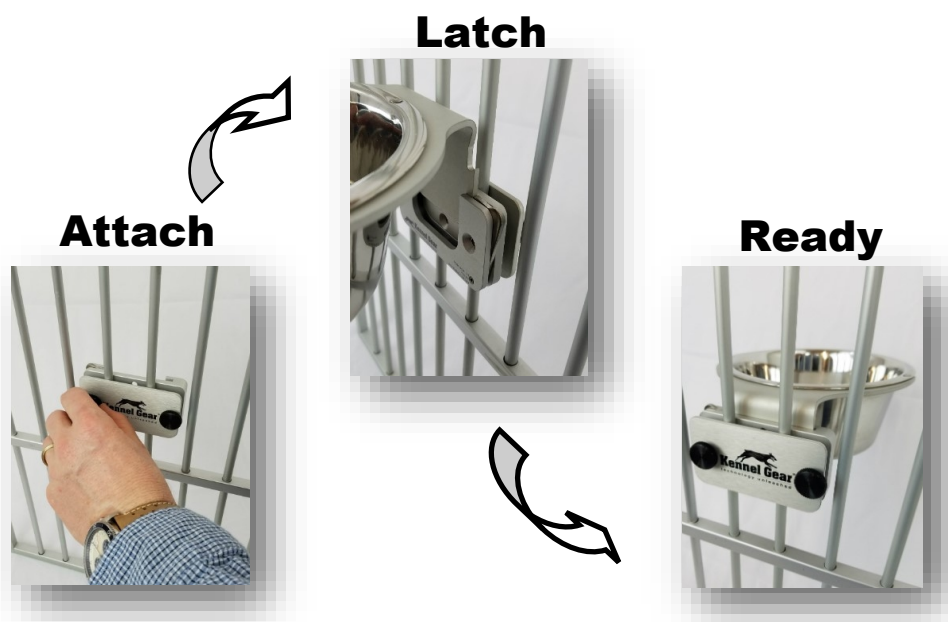

The medium strength bowl attachment is made of an 11 gauge 304 stainless steel this product does not bend back into place. The heavy duty bowl attachment is made of .188" 304 stainless steel.

This heavy duty bowl attachment has an additional piece on the insert part that helps the product stay more secure in the locking block.

Kennel Gear Stainless Steel Pails

4 Quart Pail System

4 Quart Pail System

1 Quart Crate Pail System

Stainless Steel Pails System

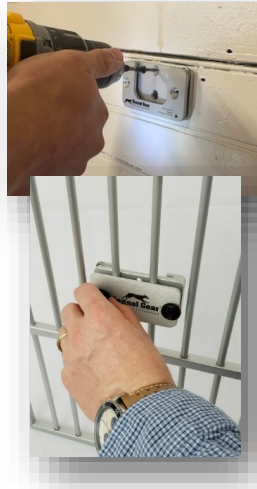

Kennel Gear's Stainless Pail System is a height adjustable feeding solution. The stainless steel pails come in various sizes. All of the sizes are interchangeable with any of the mounting options Kennel Gear offers. The standard pail will sit with the insert block and locking block, directly in the center of the back of the pail. The crate pail insert block and locking block will offset the pail to tuck the pail into the corner of the travel kennel; thus will allow for more of the kennel to be utilized by your pet. When installing the pail, Kennel Gear advises to keep the handle turned on the back side of the pail and to use the bottom two bolts as your fill line.

Kennel Gear Crate Style Bowls & Pails

1 Quart Crate Pail System

1 Pint Crate Bowl System

Crate Style Bowl and Pail System

Kennel Gear's Stainless Bowl or Pail System is a height adjustable feeding solution. The offset in the bowl attachment and pail attachment allows for the bowl or pail to be tucked into the corner of the crate. With the pail securely tucked into the corner of the crate, this will allow for your pet to utilize more of the usable space in the crate. The offset also allows for maximum room for viewing!

Kennel Gear Hydration Station

Hydration Station

Kennel Gear's Hydration Station System is a self filling water dispensing system. This is designed to hook up to an outdoor water hose spicket and refill itself when the water gets below the low sensor. The Trough can hold a maximum of 5.5 Quarts of water and will refill back to maximum capacity at a low level of 2.5 Quarts or less. The Aqua Lox system has been designed to have a water flow and a quick disconnect. If you choose to disconnect while the water is flowing, it will automatically stop filling with no mess. All of the important components to the unit are kept out of reach of your pet. Just like with all of Kennel Gears systems, safety is priority. The unit uses an AC/DC adapter which protects the user, both human and fur, from coming in contact with an electrical current greater than 2 watts.

Kennel Gear Versa Feeder System

360 Versa Feeder Standard w/ Bones

PN: 100.126.000

Versa Feeder System

Kennel Gear's Versa Feeder System is a lazy Susan style feeder. This is ideal for boarding facilities. The Versa Feeder allows for a barrier to remain between the handler or person feeding the animal and the animal. The two slots on each side allow for the mount to be adjusted to accommodate the different bowls and pails Kennel Gear offers. There are also two fixed holes in the center of the Versa Feeder, in the event you would only want to specifically feed or water the animal. There are two tabs on the outside that allow the versa feeder to be "locked" into place. The tabs come in two variations, bones or paws.

Supply Caddy w/ Plastic BM (YELLOW)

Kennel Gear Supply Caddy

Kennel Gear's Supply Caddies are designed to be compact for small storage. The design of this product was to keep the groomers eyes on their clients on the table and to keep all of their grooming supplies in a safe accessible location that was within reach. These are ideal for Groomers, Veterinarians, Boarding Facilities, Rescues, and personal use. The small storage the caddy offers allows for Groomers to keep a minimal amount of grooming supplies with them, Veterinarians to keep smaller surgical supplies or dental supplies securely at their work station. All of the ideal professional users can utilize the color options to signify specific care needs for their clients, for example; Diet Restriction, aggressive behavior, Medication needs, or to keep their personal belongings with their clients.

For personal use this would be ideal to keep leashes, dog waste bags, treats, etc. The slotted bottom allows for water, fur, and other debris to quickly and easily be cleaned out and the prevention of mold and mildew from forming

Kennel Gear IV Pole

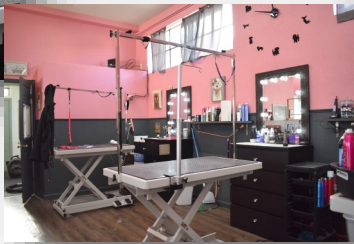

IV Pole (Vertical) at its standard height

IV Pole (Vertical) Single Hook System.

(Part Number: 112.138.001)

IV Pole (Vertical) at its expanded height

Kennel Gear IV Pole

Kennel Gear's IV Poles are designed specifically for veterinarian use. With the universal mounting option the IV Pole can quickly disconnect from a table mount at the surgical table and be transferred easily to a locking block on the recovery kennel. The Vertical IV Poles height can be adjusted between 17 inches and 24 inches and are designed to mount to the front of a recovery kennel. The Horizontal IV Poles height can be adjusted between 11 inches to 21 inches and are designed to mount to the top of a single recovery kennel. Being able to transfer the IV Pole with the animal helps prevent the mess of tubes and crossing lines when transferring the animal in surgical recovery.

Kennel Gear Mounting Options

1/2 Inch Locking Block

Universal locking block that has a standard lever.

Part Number: 101.000.000

1/2 Inch Locking Block with Extended Lever

Universal locking block that has an extended lever.

Part Number: 102.000.000

1/2 Inch Locking Block with Adhesive Backing

Universal locking block that has a standard lever and an adhesive that can adhere to most any solid flat surface.

Part Number: 103.000.000

5 Inch Wide Locking Block

5 Inch wide and 1/2 inch thick locking block with a standard lever.

Part Number: 105.000.000

5 Inch Wide Locking Block with Extended Lever

5 inch wide and 1/2 inch thick locking block with an extended lever.

Part Number: 106.000.000

Kennel Gear Mounting Options

1/2" Bar Mount System

This system includes the universal locking block, two 3/4 inch thumbscrews and a Kennel Gear back plate.

Part Number: 112.000.001

1/2" Bar Mount System with Extended Lever

This system includes the universal locking block with an extended lever, two 3/4 inch thumbscrews and a Kennel Gear back plate.

Part Number: 117.000.001

Wide Bar Mount System 1/2"

This system includes the universal 5 inch wide locking block, two 3/4 inch thumbscrews and a Kennel Gear back plate.

Part Number: 122.000.001

Wide Bar Mount System 1/2" with Extended Lever

This system includes the universal 5 inch wide locking blocking block with an extended lever, two 3/4 inch thumbscrews and a Kennel Gear back plate.

Part Number: 127.000.000

Kennel Gear Mounting Options

3/4" Surface Mount

Universal locking block that is 3/4 inches thick with a standard lever.

Part Number: 136.000.000

3/4" Bar Mount System

This system includes the universal 3/4 inch locking block, two 3/4 inch thumbscrews and a Kennel Gear back plate.

Part Number: 149.000.001

Plastic Bar Mount System

Universal plastic locking block with 1 inch thumbscrews and a Kennel Gear plastic back plate.

Part Number: 149.000.001

Chain Link Fence Mount

Two 6 inch square plate that comes with four 1-1/4 inch thumbscrews.

Part Number: 160.000.000

Kennel Gear Mounting Options

Vertical Post Mount

This system mounts directly to a round post. It can accommodate a 3 inch diameter.

Part Number: 161.000.000

Hitch Receiver Mount

This system fits a 2 inch hitch receiver . You cannot tow with this unit.

Part Number: 166.000.000

Small Table Mount

This system is meant for tables with a smaller thickness. It can accommodate between 1/2 inch to 1-3/4 inch tables.

Part Number: 172.000.000

Large Table Mount

This system is meant for tables with larger thickness. It can accommodate between 1 inch to 3 inch tables.

Part Number: 176.000.000

Height Adjustable Mount

This mount uses a Unistrut rail to allow you to adjust the height to accommodate the pet size.

Part Number: 163.000.000

Kennel Gear Attachment Options

Standard Insert Block

The Standard insert block is a 2 inch by 2-1/2 inch insert that follows the AMPS hole pattern of 1-3/16 inches by 1-1/2 inches and a 1/4-20 center hole.

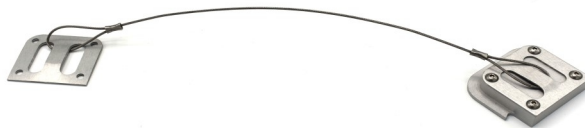

Part Number: 99504

D-Ring Insert Block

The D-Ring insert block is a perfect tool to use as a tie off point for various items. The pull strength of this insert block is up to 306 pounds.

Part Number: 100.148.000

Furniture Tether

This tether can anchor furniture along with other various small structures and can withstand up to 250lbs of pulling force.
